FRONTEND ENGINEER

Frontend Developer with over eight years of experience building scalable web applications for international markets (United States, LATAM, and Europe). Specialized in React, frontend architecture, and performance optimization, with a strong focus on code quality and user experience.
Experience defining technical standards, project foundation structures, and development workflows.
Active integration of artificial intelligence tools (Cursor, Claude Code, GitHub Copilot, PR automation, code analysis) to improve productivity, consistency, and technical decision-making across teams.

WORK EXPERIENCE

May 2025 – Present
FULL STACK DEVELOPER, FAIXAPATH

- Creation of FaixaPath, a platform specialized in structured Brazilian Jiu-Jitsu learning through the visualization of techniques and transitions.
- Development and maintenance of Web, Android, and iOS applications distributed in public beta.
- Design of a technical roadmap system based on interactive graphs for exploration, planning, and progress tracking.
- Implementation of a React + Fastify + Supabase architecture, including frontend, backend, authentication, and storage.
- End-to-end management of the product lifecycle: functional definition, UX, development, deployment, and support.

July 2025 – June 2026
FRONTEND DEVELOPER, HUENEI IT SERVICES

- End-to-end frontend development for a mental health telehealth platform targeting the U.S. market (Vue), contributing to technical definition, architecture, and user flow design.
- Implemented React frontend for a web + mobile product focused on U.S. minor league baseball, improving cross-platform consistency and user experience.
- Developed and evolved an operational management module for an agribusiness company, optimizing internal workflows and usability in real-world business contexts (React).

- Contributed to a real-time video call solution with an AI assistant, integrating technologies such as Tavus and Daily for conversational experiences (React).
- Defined frontend architecture for a U.S. insurance sector project, establishing the base structure, best practices, and performance focus.
- Implemented internal guidelines for AI-assisted development using Cursor (rules, commands, skills), improving code consistency, development speed, and quality across multiple projects.

September 2023 – May 2025

FRONTEND DEVELOPER, Santander Tecnología Argentina

- Developed a critical Terms and Conditions module for Homebanking, with direct impact on end users and regulatory compliance.
- Refactored internal tools in React, incorporating TypeScript, CI/CD, and architecture improvements to increase maintainability and scalability.
- Reduced code duplication to below 4% and increased test coverage above 80% using Jest and Cypress.
- Identified and resolved critical vulnerabilities, strengthening frontend security in a financial environment.
- Collaborated in a team using SCRUM methodology with version control in GitLab, actively participating in code reviews and continuous code improvement.

September 2022 – September 2023

FRONTEND DEVELOPER, Real Trends

- End-to-end development of an e-commerce platform ("Tienda"), launched to production as an alternative to Mercado Libre, enabling sellers to create and manage their own online store.
- Built a Design System in collaboration with the design team, improving visual consistency, component reuse, and development velocity.
- Optimized user experience through adaptive UI, accessibility, and pixel-perfect standards compliance.
- Implemented internationalization (i18n) and localization for Argentina, Mexico, and Brazil, supporting multiple business contexts.
- Introduced Cypress testing to ensure code quality, stability, and maintainability.
- Worked under SCRUM methodology with version control in GitHub, participating in continuous product iterations.

January 2021 – March 2022

FULL STACK DEVELOPER, MAS Global Consulting (Client: Johnson Controls International)

- Developed critical modules (shopping cart, billing, and sales) for a global platform, supporting operations across multiple regions.

- Contributed to a hybrid architecture combining .NET Framework, .NET Core, and Angular/React frontend in enterprise environments.
- Implemented internationalization (i18n) for multi-region support, adapting interfaces to different markets.
- Developed unit tests on frontend and backend (MSTest, Jasmine, Karma, Jest) to ensure reliability in high-impact modules.
- Worked under SCRUM methodology with version control in TFS, in distributed teams and corporate environments.

January 2020 – December 2020

FULL STACK DEVELOPER, Edenred Argentina S.A.

- Migrated legacy systems (.NET Framework) to a modern architecture based on .NET Core and React, improving maintainability and scalability.
- Developed a customer onboarding system with SQL Server integration and layered architecture.
- Implemented unit tests on backend (.NET Core) and frontend (Jest) to ensure system quality and stability.
- Worked under SCRUM methodology with version control in TFS.

January 2016 – September 2016

.NET DEVELOPER, Santa Rita de Cascia C.A.

- Developed a veterinary control system for livestock management, focused on traceability and operational record-keeping.
- Integrated ALLFLEX electronic identification readers for automated data capture.
- Developed desktop applications with .NET Framework 4 and WinForms (C#).
- Designed and implemented an SQL database for information storage and querying.
- Optimized registration processes, reducing manual errors in data entry.
- Provided technical support and evolutionary adjustments to features based on operational needs.

November 2014 – December 2015

.NET DEVELOPER, SOLO SISTEMAS C.A.

- Developed an internal system for source code control and access management within the company.
- Implemented desktop applications with .NET Framework 4 and WinForms (C#).
- Designed and maintained an SQL database for information storage.
- Contributed to feature improvements and incident resolution in production environments.
- Collaborated on defining basic system structures and data organization.

AI DEVELOPMENT & TOOLING

- Defined and implemented an AI usage strategy for frontend development.
- Advanced Cursor configuration (rules, commands, skills) for frontend project standardization.
- Integrated automated code analysis tools (Bugbot).
- Proposed workflows to synchronize code, tickets (Jira), documentation, and local PR evaluation.
- Improved productivity and code quality through automation and contextual assistance.

SELECTED PERSONAL PROJECTS

FaixaPath – Interactive Brazilian Jiu-Jitsu Roadmap

- Designed and fully developed a graph-based web application to visualize technical progressions in Brazilian Jiu-Jitsu, enabling study of real routes between positions and transitions.
- Implemented interactive visualization using React Flow with automatic layout via ELK.js, optimizing graph readability and navigation.
- Domain modeling based on nodes (techniques) and edges (transitions), enabling structured exploration of technical knowledge.
- Developed an advanced filtering system by role, phase, and intent for contextual graph segmentation.
- Built a detailed technique view focused on progressive learning.
- Implemented an admin panel for full management of techniques and transitions.
- Modular architecture with clear feature separation.
- Global state management with Zustand, optimizing performance and data control in complex UIs.
- Robust forms with React Hook Form + Zod for typed, consistent validation.
- BFF (Backend-for-Frontend) integration for secure data handling and signed media URL generation.
- Accessible, decoupled UI using Radix UI and Tailwind CSS.
- Multi-language support implemented with i18next.
- Released in Beta on Google Play Store.
- Website: https://www.faixapath.xyz/

Kyronga – Educational app for learning Japanese

- Fully developed a React Native mobile application for visual Japanese learning.
- Includes practice for syllabaries (hiragana, katakana), kanji, and handwriting.
- Feature to mark difficult cards and reinforce memory.
- Published on Google Play Store for free use.
- Website: https://www.kyronga.com/

Cinema Memory – Personal website about movies

- Developed a personal website where I publish brief reviews of movies I have watched.
- Built with React and Next.js, using TypeScript and a custom Design System.
- Integrated with a public API to retrieve movie data.
- Focused on performance, simple UI, and fast navigation.
- Website: https://www.cinemamemory.com/

anwar-components – React component library

- Developed a reusable UI component library for personal React projects.
- Built with TypeScript and published on NPM to share with the community.
- Includes visual components with decoupled styles, focused on simplicity and customization.
- Actively used in personal projects such as Cinema Memory.
- Available at: https://www.npmjs.com/package/anwar-components

TECHNOLOGIES

Frontend: React, Vue, Angular, React Native, TypeScript, JavaScript (ES6+), HTML5, CSS3, SASS, style-components, Tailwind CSS, Radix UI.
State Management: Zustand, Redux, MobX, Mobx State Tree, React Query (TanStack).
Forms & Validation: React Hook Form, Zod.
Testing: Jest, Cypress, Jasmine, Karma, MSTest.
Backend / Fullstack: .NET Framework, .NET Core, C#, WinForms, SQL Server, MongoDB, APIs REST, BFF.
Architecture & Product Engineering: Frontend architecture, Design Systems, performance optimization, accessibility (a11y), internationalization (i18n), localization.
DevOps & Collaboration: Git, GitHub, GitLab, TFS/Azure, Docker, CI/CD.
AI Tooling: Cursor, Bugbot, GitHub Copilot, Claude Code.
Libraries / Specialized tools: React Flow, ELK.js, i18next, Figma.
Integrations: Daily, Tavus

EDUCATION

JULY 2017
ENGLISH ACADEMIC YEAR, Kaplan International School

FEBRUARY 2016
SYSTEMS ENGINEERING, Instituto Universitario Politécnico Santiago Mariño

LANGUAGES

- Spanish: Native
- English: B2
- Portuguese: B2
